

Bintel Analytics

Business Intelligence & Analytics Services

Company Profile

01 THE COMPANY

Bintel Analytics is a Malawian registered company that specializes in data management services delivered as business intelligence and analytics solutions. We create value by providing business intelligence (BI) and analytics solutions, allowing our clients to source, store and utilize data to discover valuable insights and make informed decisions that propel their businesses.

We are a unique service provider offering full-stack business intelligence and analytics solutions that cover every aspect, ranging from data collection, data analysis and mining, reporting, to archiving. Our focus is to ensure that businesses have the proper systems, computing and data storage infrastructure, data and data products, and the capacity to effectively deploy and use the BI tools of their choice.

Mission

To provide business intelligence and analytics solutions to our clients, equipping them with the means and skills to source, store and utilize data to discover valuable insights and make informed decisions.

Vision

To lead a vibrant, informed and competitive business ecosystem propelled by fact-driven business insights.

Values

We execute our mission guided by the strong values of **integrity**, **service**, **innovation**, **social entrepreneurship**, and **openness**.
